

# Pipeline Construction Services

## *Experience • Safety • Dependability*

MISTRAS Services Division, a member of MISTRAS Group, Inc., provides several specialized inspection techniques and technologies for a full range of buried and above ground pipeline systems.

Our Pipeline Integrity Center of Excellence (COE) supplies pipeline integrity experts that perform Direct Assessments throughout North America. We have set the standard for cross-country oil and natural gas pipeline construction services. As the need for underground utilities continues to grow, we lead the way with a broad spectrum of utility pipeline construction services.

### Radiography

Make MISTRAS Services your NDE supplier of choice for all your X-ray and Gamma Ray radiography requirements with our:

- 7 self-contained 4x4 mainline darkrooms.
- 13 late model x-ray and gamma ray crawler spreads complete with back-up units.
- Over 45 Labs in North America providing 24/7 support
- Occus Signatory
- Operating under procedures and supported by an engineering and management team unparalleled in the NDT industry

### Advanced Automated Ultrasonics

We specialize in the proper application of a variety of Automated Ultrasonic techniques to accurately monitor discontinuities over successive inspection intervals, calculate growth rates of discontinuities and plan repair or replacement activities.

- 3 complete new Weldstar Weld Testing Systems
- Conventional and phased array ultrasonics.
- G.P.S.
- Meets APT 1104, DNV-OS-101, CSA Z-662 and other industry specifications.
- Industry qualified and factory trained technicians
