

## Pipeline Integrity Inspection Services

MISTRAS provides several specialized inspection techniques and technologies for a full range of buried and above ground pipeline systems.

Our Pipeline Integrity Center of Excellence (COE) supplies pipeline integrity experts that perform Direct Assessments throughout the United States. These Direct Assessments come in varying forms and detail which include External Surveys, Internal Surveys, Automated Ultrasonics and Close Interval Surveys. Our Pipeline Integrity technicians have the qualifications and tools to complete any integrity function including soil and topography examinations necessary to comply with State and Federal laws.

### OUR PIPELINE INTEGRITY INSPECTIONS:

- Complete project management for ILI or Direct Assessments
- Line location Verification
- Excavation Supervision for foreign objects
- Visual Coating Inspection and Mechanical Holiday inspection
- Soil Assessment (including MIC IV or MIC V)
- Cathodic Protection Survey
- Pipe to Soil Potentials
- ILI Correlation
- ID or OD Metal Loss Assessments, Dent Assessments, Mechanical Damage Assessments, Cracking Assessments and ERW Issue Assessments
- Burst Pressure Calculations
- Repair Inspection utilizing a variety of NDE

- Grind Repairs on mild cracking and Long-seam issues
- Backfill and Remediation Supervision
- GPS coordinates for any assets requested (i.e. ditch start and end, anomaly locations, repair start and end and final backfill locations)
- Full Photographic Documentation
- Final Report guaranteed within 48 hours for almost every dig (some exceptions do apply)

Contact us today for an immediate assessment of your pipeline integrity needs, a quotation of services, or to learn more about MISTRAS Services Division.
